

STOP IDLING SAVE YOUR MONEY AND THE ENVIRONMENT

WHY SHOULD I STOP IDLING MY VEHICLE?

An idling vehicle:

- Pollutes
- Wastes fuel
- Decreases engine life
- Annoys your neighbours in the morning
- Unnecessary with today's fuel-injected engines

THINGS YOU CAN DO TO REDUCE IDLING

- Turn the engine off when waiting to pick up passengers, in drive-through line ups or running in to buy groceries
- Minimize use of remote-car starters
- Use a block heater to warm up your engine in cold weather

For information, go to www.pamz.org.

BY STOPPING IDLING YOU REDUCE
EMISSIONS, IT COSTS YOU NOTHING
AND YOU SAVE MONEY.
